# STATISTICS OF WESTERN AUSTRALIA.

(All figures in heavy type are preliminary figures, liable to revision.)

As no Census data have as yet become available excepting preliminary totals for the State, for the Commonwealth Electoral Districts, and for the Metropolitan Area, the revision of figures prior to the 3rd of April last is unavoidably held over, as also the publication of all averages, etc., dependent thereon.

## I.—POPULATION AND VITAL STATISTICS.

Estimate of Population of Metropolitan Area, 31st December, 1919—Males, 62,000; Females 80,000; Total, 142,000. (Preliminary Total at Census, 3rd April, 1921, 155,129.)

### No. 1.—Population of Western Australia (exclusive of full-blooded Aborigines) from 1911.

Period.	Estimated Population on last day of period.			Increase during period.	Masculinity. §	Mean Population.
	Males.	Females.	Total.			
1911 ... ..	168,094	126,087	294,181	17,349	14·28	286,807
1916 ... ..	159,998	148,808	308,806	†9,210	3·62	314,710
1917 ... ..	158,701	150,722	309,423	617	2·58	308,579

\* In the case of Agricultural Production, seasons ended last day of February in following year.

## IX.—GOLD MINING STATISTICS.

**No. 31.—Annual Gold Production of Western Australia from 1886, comprising Raw Gold entered for Export, plus Raw Gold received at the Perth Branch of the Royal Mint (from May, 1899) ; also amounts of Dividends paid.**

Period.	Quantity of Raw Gold.			Value.	Dividend Paid.
	Exported Direct.	Received at Perth Mint.	Total.		
	Fine ounces.	Fine ounces.	Fine ounces.	£	£
Prior to 1916	10,886,635	18,601,622	29,488,257	125,258,154	25,494,386
1916	26,742	1,034,656	1,061,398	4,508,532	632,883
1917	9,022	961,295	970,317	4,121,645	590,856
1918	15,644	860,867	876,511	3,723,183	368,295
1919	6,446	727,620	734,066	3,118,113	338,244
1920	4,973	612,869	617,842	2,624,424*	384,083
1886 to 31st December, 1920	10,949,462	22,798,929	33,748,391	143,354,051*	27,808,747
January, 1921	524	50,935	51,459	218,582	39,000
February, 1921	685	26,873	27,558	117,058	2,858†
March, 1921	11	47,875	47,886	203,409	†
April, 1921	671	46,602	47,273	200,804	46,250†
May, 1921	475	47,638	48,113	204,373	20,000
June, 1921	154	28,194	28,348	120,415	43,750

\*In accordance with prices realised by the Australian Gold Producers' Association on the export sales of gold, the average price for each ounce (fine) of bullion for the fiscal year 1919-20 was £54727. On this basis the value of the gold production for 1920 may be increased to £3,381,264, with a consequent increase of the total gold production to the end of that year to £144,110,891. † Amended figures.

**No. 32.—Monthly Gold Production of Western Australia, being Export of Gold plus Gold received at the Perth Branch of the Royal Mint, from 1911.**

a Extending from Fremantle to Midland Junction, both inclusive. b Albany, Bunbury, and Geraldton. c Northam and Katanning.

The above articles comprise all the commodities in the Groceries and Meats groups covered by the Commonwealth Statistician's inquiry. The index number representing the cost of these commodities in July, 1914, was 1,340; for March, 1921, it was 2,178; for April, 2,132; for May, 2,115; and for June 2,081. As compared with July, 1914, the increase in the cost of the commodities was: March, 1921, 62 per cent.; April 59 per cent.; May 58 per cent.; and June 55 per cent. The decrease occurred mainly in the prices of groceries, where rice, candles, soap, kerosene, butter, bacon, and ham showed appreciable reductions.

The average rents for June, so far as the Metropolitan area is concerned, were ascertained after making an inquiry into the rents charged for about 1,000 houses. The average rent for the Metropolitan Area was 19s. 3d. Some difficulty was experienced in giving the proper "weight" or due proportion of importance to the different classes of houses. To have taken the average of all the rents would have given wooden houses an importance which is not warranted, there being a preponderance of brick houses in the Metropolitan Area. The Census figures showing the number of brick and wooden houses were not considered acceptable as, since 1911, the great majority of new dwellings erected have been built of brick. Returns were therefore obtained from a number of agents, giving particulars as to the structure of the houses, numbers of rooms, and weekly rentals, and this inquiry disclosed the average rental to be 19s. 3d.

\* It should be carefully noted that each award applies only to some particular area. The rates of wages payable on the Goldfields may not be, in a few instances, fixed by any award, but the ruling rates are, for the most part, higher than those payable in coastal districts for similar occupations. In some cases private agreements, which are not yet filed at the Court, have been quoted from. † With Board and Lodging. *a*. Newspaper rates provided for in separate agreement, including Composing, Stereotype, and Machine Room Workers. *b*. Special hours.

## XV.—METEOROLOGICAL STATISTICS.

### No. 42.—Notes on the Rainfall of Western Australia for April, May, and June, 1921.

*April.*—The month of April was extremely dry practically throughout the State. Disturbances of Southern type passed along the South Coast at frequent intervals from the 14th onward, but the rains associated with them were very light except in the extreme South-west corner, where a few stations registered totals in excess of the average. The only other instance in which the normal was exceeded was at the Gascoyne Junction, where a thunderstorm fell at the opening of the month. With this and one or two other trivial exceptions no rain at all visited the Tropics and Gascoyne, while only isolated registrations were effected over the Midland and Eastern agricultural areas and the Coolgardie Goldfields.

*May.*—Taking the State as a whole, May, 1921, ranks amongst the wettest Mays ever experienced. In the latter half of the preceding month depressions of a type often associated with good winter rains were frequently featured on the Weather Chart, but, although well developed, they always passed away without any rainfall apart from a few coastal showers. At the close of the month, however, another of these systems appeared, and as a result fair to moderate, and, at an isolated place or two, heavy gaugings were effected on the 1st May throughout the agricultural areas. Relatively fine weather then intervened until the 5th, when a new disturbance brought excessively heavy rain to parts of the extreme South, 6·84 inches being measured at Bremer Bay and 4·08 at Albany on the following morning. The rain gradually extended to other parts of the State, but in a somewhat erratic fashion. On the morning of the 7th, for example, amidst a large number of light to moderate gaugings, Wongan Hills measured 2·50 inches, and three or four other scattered stations, including Mt. Sir Samuel, between 1½ to 2 inches, while during the ensuing 48 hours falls of an inch, though more common, were again interspersed with a much larger number of trivial gaugings. On the 10th the rain had practically finished, but the registrations for the 24 hours ended 8 a.m. on that day included remarkable downpours in the Metropolitan area, 2·40 inches being measured at the Perth Gardens. This storm also affected the Murchison, where rain was very badly needed. The falls on this occasion were not heavy enough to break the drought, but this was compensated for in the following disturbance commencing on the 12th, which brought the aggregate falls for the month over this region to a minimum of an inch at Meekatharra, rising to over 3 inches both to the South and to the North of that centre. This storm cleared away on the 16th, after bringing excellent falls to every portion of the State South of the Tropics. The interval of fine weather was again brief. On the 20th an intense cyclonic system developed and remained practically stagnant until the 30th. Rain during this period extended to every portion of the State except East Kimberley. The gaugings were everywhere heavy and of a more consistent character than during the earlier half of the month, although the tendency to particularly heavy local falls was still noticed. At Wallall a practically isolated gauging of 2 inches was measured on the 22nd, and in the neighbourhood of Minginew and Dongara a very heavy local downpour occurred on the 29th, causing washaways on the railways. On the 27th another big fall at Bremer Bay yielded 3·24 inches, and one at Irsaelite Bay on the following day 3·27 inches. In the North-West, however, this rainstorm was productive of its most remarkable gaugings, Port Hedland reporting a total of 6·69 inches, and most of the other stations upwards of 4 inches.

Taking the month as a whole, excesses were met with at every station South of Kimberley. At a number of stations on the West and South-west Coasts the aggregate gaugings exceeded 10 inches, rising at Fremantle (Oval) to 13·87 inches, or 9·65 inches above the average; at Geraldton to 12·96 inches (10·26 inches above), and at Bremer Bay to 15·80 inches (12·54 inches above). In other parts of the State the totals, although smaller, amounted to 3 or 4, and in some cases as much as 6 or 7 times the normal rainfall for May. They were smallest over parts of the Northern Murchison (Mundiwindi 2·50 inches), but even here the monthly averages were exceeded by 1 to 2 inches. In West Kimberley, Broome, and La Grange both measured over 2 inches, and lighter falls occurred inland to Fitzroy Crossing, but further East 16 points at Wyndham was the only gauging.

A comparison with the records for previous years shows that at a large number of stations in all quarters of the State the totals were the heaviest ever recorded for the month of May. In other localities heavier registrations have been recorded for various years, but taking the State as a whole, the rainfall no doubt represents something in the nature of a record for the month.

*June.*—The earlier half of the month of June was characterised by a continuance of conditions similar to those experienced during May, and heavy rains reached all agricultural areas, extending on various dates to the Gascoyne and Goldfields, and also, during the first few days,

to the North-west districts. The remainder of the month witnessed a decided change. High pressures assumed control of the Weather Chart, and the depressions, passing well out to sea, were very limited in their rain-bearing capacity. Showers frequently visited the Coast, and at times reached the wheat belt, and even, towards the end of the month, penetrated to the Coolgardie Goldfields, but the inland falls were trivial in amount.

This abrupt change in the character of the month's rainfall was productive of some very irregular results. While, on the whole, deficiencies were the rule, a large number of scattered localities, situated chiefly on the South-west Coast, the Coolgardie and Southern Murchison Goldfields, and in parts of the North-West, reported excesses, which, in many cases, were decidedly large. At Busselton, for example, the average was exceeded by 4.29 inches, while Denmark, in the same sub-division, reported a defect of 3.37 inches.
